Learn More | Claris V

The Claris V CBCT captures 3D studies with its ultra large 17" by 17" detectors while providing the functionality of a traditional x-ray room. With its cesium sensor technology, studies for equine, reptile, mammal, exotic, and countless other veterinarian applications are available through one streamlined workflow.

The Claris V CBCT low dose tomosynthesis modality provides low dose studies and high imaging throughput. The Claris V CBCT simplifies workflow minimizing cost and shorter treatment time. The result for the Claris V CBCT is a streamlined, all-in-one cone beam CT machine that addresses emergency care, surgical planning and general imaging needs.
